All you need to request, gather, and validate information

CredentialStream® is an ecosystem built upon a continual stream of platform enhancements, evidence-based content, curated data, a robust community, and services to support you and your organization. Our solution includes everything you need to request, gather, and validate information about a provider to create a Source of Truth to serve downstream processes.

Content library of payer and privileging forms

Standardized industry data tables

Seamless provider communication via the Hub

★★★★★

The best aspect about CredentialStream is that it is a "one stop shop"! I use CredentialStream all day every day. Any and all information regarding a provider is available to me at any time. At any point I am able to access any information needed regarding a specific provider. I would highly recommend CredentialStream to everyone who manages the credentialing process. The ability to streamline all my processes and verifications has allowed me a level of comfort and reassurance in my job.

HealthStream.

Ignite the power of CredentialStream with these six products to serve your entire provider lifecycle

Enroll

- Automate the provider enrollment process and speed up the revenue cycle
